OUTLINE

TIMELINE

demo > W12-async > 7-async-tutorials > JS app.js > [0] getData

```
1 const btn = document.querySelector('.btn');
2 const url = './api/people.json';
3
4 btn.addEventListener('click', async () => {
5   const data = await getData(url);
6   await displayData(data);
7 });
8
9 const getData = async (url) => {
10   try{
11     const response = await fetch(url);
12     const data = response.json();
13     console.log('response',response);
14     console.log('getData',data);
15     return data;
16   } catch(error){
17     console.log(error);
18   }
19 };
20
21
22 const displayData = async (data) => {
23   console.log('data',data);
24   const displayContent = data.map((item) => {
25     return `<p> ${item.name} </p>`;
26   }).join('');
27   const divElement = document.createElement('div');
28   divElement.innerHTML = displayContent;
29   document.body.appendChild(divElement);
30 }
31
32
33 // btn.addEventListener('click', () => {
34 //   getData(url);
35 // });
36
37 // const getData = (url) => {
```
